## Benefits of **On-Site Drug Testing**

---

*Here are just a few of the many benefits of on-site drug testing for you to consider...*

### Convenient scheduling

On-site testing allows for all shifts to be covered. The timing and environment of the testing is controlled, minimizing the possibility of errors or manipulation of results.

### Reduced downtime and quicker results

On-site testing reduces time away from work...employees have shorter wait times and can get back to work much quicker than going off-site.

### Minimized test cheating

On-site testing provides control of the entire testing process. It is almost impossible for employees to tamper with the process or test results.

### Reduced company and supervisor liability

Liability for transporting the employee to an off-site facility is eliminated when using on-site testing. Use on-site testing to eliminate any concerns about transportation accidents, and keep your insurance costs down by not having to transport employees to other locations.

### Assure compliance with HIPAA, DOT regulations and Union contracts

The Genesis Shop's on-site testing process keeps you in compliance with HIPAA requirements, Department of Transportation regulations for random testing, as well as any union contracts that may apply to your workforce.

### The Genesis Shop can help
